## YOUR WEEKLY TENDERS REVIEW

### TIPS TO GET A GOVERNMENT TENDER

1. You need to always go through the bid documents carefully.
2. Always make sure your documents are completed in full.
3. A proper cost analysis needs to be done when calculating your bid prices. A bid calculated either too high or low will be considered unresponsive.
4. You need to inquire about the bid and get all the relevant information before completing the tender document.
5. If you were unsuccessful in the bidding process, feel free to ask about why you failed. With that information, you will learn from the mistakes made.
6. Meet all requirements within the specified time, in the event your bid is successful, honour it.
7. Do not offer any false information or misinterpretations in your bid documentation, and it is highly illegal and enforceable by law.
8. Make sure you deliver on quality services and products as this will improve your track record and right standing with the department and by extension, give a proper face to small businesses in general.

Are you a supplier and intend to do business with the government? Good news is, you do not have to physically go to government offices and be in long queues for hours to transact business.

More so, you do not need "connections" to get a government tender, as long as you have the required qualifications, you can go for IFMIS self-registration.

In order to position your entity to get tenders it is important to play by these rules:

**Rule 1:** Make sure your business is registered, either as a sole proprietorship, partnership, limited company or a cooperative.

**Rule 2:** Obtain a PIN and tax compliance exemption certificate for the business from the Kenya Revenue Authority (KRA).

For more information about this you can visit the KRA website.

**Rule 3:** It is important to obtain requisite certifications from professional bodies and authorities. For instance, if you're physically disabled, you may need to obtain requisite certification from the National Council for Persons with Disability.

## PUBLIC NOTICE

### PROVISION OF ILLEGAL COURIER SERVICES DURING THE COVID-19 PANDEMIC PERIOD

The Communications Authority of Kenya (CA) is the regulatory agency for the ICT industry with responsibilities in telecommunications, e-commerce, cyber security, broadcasting and postal/courier services. The Authority is also responsible for managing the country's numbering and frequency spectrum resources, administering the Universal Service Fund (USF), as well as protecting the interests of ICT users.

In line with its mandate, the Authority facilitates domestic and cross border e-commerce activities by licensing national and international courier service providers to transport and deliver packages.

It has come to the attention of the Authority that a number of Public Service Vehicle (PSV) SAC-COS and e-commerce market platforms, have taken advantage of the COVID-19 pandemic to offer courier services without being licensed.

The Authority wishes to notify the public that the Kenya Information and Communications Act, 1998, prohibits the provision of any Postal/Courier service except in accordance with a valid licence. Section 49 of the Act stipulates that any person who contravenes the provisions of this section commits an offence and shall be liable on conviction, to a fine not exceeding three hundred thousand shillings, or to imprisonment for a term not exceeding one year, or to both.

To ensure their safety and avoid exposing themselves to risks arising from engaging illegal service providers, members of the public are hereby advised to confirm by way of demanding to view a valid compliance certificate, that any person offering to deliver packages locally or internationally is duly licensed by the Authority. By engaging the services of duly authorised operators, consumers enjoy the security of prescribed complaints resolution and compensation mechanisms.

The Authority has developed a courier market structure and licence administration framework under which different categories of courier licences are granted. The register of duly licensed courier providers is available on the Authority's website: <https://ca.go.ke/industry/postal-and-courier/postal-and-courier-licence-register/>

### NOTICE TO THE PUBLIC TO SUBMIT COMMENTS ON AN ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED KEBEN DAM AND WATER SUPPLY PROJECT, NANDI COUNTY

Pursuant to Regulation 21 of Environmental Management and Coordination (Impact Assessment and Audit) Regulation 2003, the National Environment Management Authority (NEMA) has received Environmental Impact Assessment Report for the above proposed project.

The proponent, Lake Victoria North Water Works Development Agency, is proposing to construct Keben Dam and water supply which will supply water to Lessos, Sochoi, Keben, Kapchorwa, Mogobich, Anwos, Kapitidil, Cheperit, Baraton, Chemandu, Nandi Hills town, Kipgeturiyi and Kapsabet town and the surrounding areas until 2045. The project will be located approximately 35 Km East of Kapsabet town, Nandi County.

The following are anticipated impacts and proposed mitigation measures:

Impacts	Proposed mitigation measures
Land Acquisition	<ul style="list-style-type: none"> <li>Kenya Forest Service land to be used for the Dam reservoir, Dam Buffer and Water treatment works;</li> <li>In extreme case where private land acquisition is unavoidable, it will be compensated under the guidelines presented in the resettlement policy framework;</li> <li>Resettlement Action Plan being prepared to guide the process.</li> </ul>
Design Considerations: Impacts on Ecology, Soil and Land	<ul style="list-style-type: none"> <li>Appropriate site selection and design were conducted according to national and the WB guidelines in order to entail no or minimal disturbance to local ecology, soil and land;</li> <li>Dam components located in ecologically sensitive areas not approved, in order to avoid impact on flora /fauna;</li> <li>Plantation plan / forest / rangeland management consideration during design phase.</li> </ul>
Design Considerations: Impacts on Surface Water	<ul style="list-style-type: none"> <li>Watershed / Scheme Site interventions may affect natural drainage / run-off. This can stress local natural stream flow which may cause surface water quality degradation and contamination of water resources and affect downstream ecology;</li> <li>Improper design considerations for suspended silt / maintenance of minimum flows may degrade downstream ecology;</li> <li>Excessive diversion/use of surface water resources may lead to depletion of natural surface water resources;</li> <li>Fit vehicles with appropriate exhaust systems and emission control devices;</li> <li>Limit the idling time of vehicles not more than 2 minutes;</li> <li>Implement ECP 10: Air Quality Management.</li> </ul>
Clearing of Vegetation and Trees	<ul style="list-style-type: none"> <li>Vegetation clearance shall be limited to the extent required for execution of works;</li> <li>Avoid cutting down of tree species of conservation significance and those that are protected, even those that act as nesting and breeding sites;</li> <li>Tree plantation will be carried out in and other suitable areas near the river training works at a ratio of 5 new trees per each tree cut.</li> </ul>
Clearing of Vegetation and Trees, Terrestrial habitat	<ul style="list-style-type: none"> <li>Plant forest woodland buffer around reservoir (156 ha) ;</li> <li>Reforestation of forest woodland in riparian buffer zone (60 ha);</li> <li>Plant Riparian grassland around dam shoreline;</li> <li>Ensure approval for removing protected tree species by KFS;</li> <li>Maintain environmental flows to minimize impact on downstream riverine habitat and monitor invasive vegetation species;</li> <li>Catchment management initiatives to include better management of natural habitat within the dam catchment, including the Ceregoni Forest Reserve;</li> <li>Environmental management and awareness as part of training for employees during construction to be done.</li> </ul>
Excavation Works	<ul style="list-style-type: none"> <li>Avoid construction during the rainy season;</li> <li>Minimize digging of trenches and vegetation clearance to minimum required levels;</li> <li>Limit construction to daytime;</li> <li>Sprinkle water on the excavated sections to abate dust emissions;</li> <li>Practice soil control measures (terracing) Spoil dumping only in approved locations.</li> </ul>
Construction Works and related components Dam formation	<ul style="list-style-type: none"> <li>Limit construction during day time;</li> <li>Ensure adequate provision of the personal protective equipment;</li> <li>Ensure regular maintenance of contractors machineries and vehicles;</li> </ul>

and excavations (WTW and pipelines channels)	<ul style="list-style-type: none"> <li>Provide adequate signage and reflective tapes for restricted zones;</li> <li>Sprinkling water to reduce dust levels;</li> <li>Implement the rehabilitation plan for material sites.</li> </ul>
Construction Camps	<ul style="list-style-type: none"> <li>During construction phase the contractor site camps should be properly managed. Water usage, fuelwood cutting, deforestation, trees injury should be avoided. Community of the area should not be affected;</li> <li>Proper sanitation and construction machinery should be maintained according to environmental standards;</li> <li>The Contractor needs to establish main and site camps.</li> </ul>
Archaeological and Religious Sites (Historical sites)	<ul style="list-style-type: none"> <li>Location of all schemes are at a safe distance from sites of archaeological and religious importance, however if sites of religious significance are encountered during construction activities, the works will be stopped in that area, and the appropriate department will be informed.</li> </ul>
Impacts on Ecology, Wildlife and habitats	<ul style="list-style-type: none"> <li>Minimize construction in the critical habitats of birds;</li> <li>Care should be taken to make sure bird nests are not destroyed. If there is no option available, rehabilitate them in other neighbouring trees. Also protect and rehabilitate injured or orphaned birds;</li> <li>Use of existing access road and limit the width of new access roads;</li> <li>Implement ECP 13 Protection of Fauna for species with conservation significance especially endangered and near threatened dam;</li> <li>Consider acquiring the land directly.</li> </ul>
Downstream, Riparian and River rine Forest and Wetlands	<ul style="list-style-type: none"> <li>At the feasibility level, Mogobich river and Cheplalbei river flows will not be negatively impacted by the project;</li> <li>Assessments show that the minimum environmental flow required for Mogobich river and Cheplalbei river flows and that after Maintain environmental Flows equivalent to 90% percentile compensation flow (Q90), which is the flow that is available 90% of the time;</li> <li>Decommission diversion channel at beginning of wet season to minimize time required for dam to reach operational level (2340 masl) and commencement of environmental flow discharges;</li> <li>Hydrology report confirms there is enough environmental flow.</li> </ul>
